

NICCOLÒ PAVONE

”

Born in Milan on a sunny sunday, I grew up in Siena and graduated from college in classical studies during 2010. At the end of the same year, I decided to move in the digital field attending a summer school at Stanford University (Palo Alto, US). In 2011, I've haunted two courses in Design at RISD (Massachussets, US) and a brief Pixar Artists Masterclass in New York to specialise in animation and storytelling. Furthermore, I've been enrolled in an extensive course in Digital Creativity at Media Design School (Auckland, NZ) graduating in August 2012. Since then, I now live in Milan, specialising in helping businesses gain and develop a valuable web presence.
